

Fluoropolymer

PTFE Coatings

Advanced Medical Coatings

Miller-Stephenson's Fluoropolymer Coatings are designed to optimize strength, durability and lower coefficient of friction for specific specialty medical products. There are one and two coat options for customers who require specific technical challenges.

Availability:

1 & 2 Coat Waterbase

1 Coat Acid Primer

Key Benefits & Characteristics

- Biocompatibility
- Low Coefficient of Friction
- Flexibility
- Very Uniform Coating (5-10 Microns)
- ISO11070 Guide Wire Fracture Test
- Great Adhesion to Stainless Steel and Other Metal

Applications & Technical Data

Common Uses

- Vascular Guide Wires
- Urological Guide Wires
- Urological Resection Electrodes (Loops/Coagulation balls)
- Disposable/ Nondisposable Cautery Tips (Regular/Laparoscopic)
- Surgical Bi-Polar Tips

Application Method

- Dipping
- Spray
