Dan,  
Thanks again for taking a few minutes to chat with us today. As a follow up to our discussion I've attached the proposal for the AT&T fiber we discussed as well as a copy of the new agreement. Once you are ready, I will forward you the contract in email so you can electronically sign.

Again, this is for a dedicated 50mb fiber connection to your location with the same 23 concurrent calls as you have today. Remember, you only have a 10mb today so this new circuit will have 5 times the capacity. Also, it is a dedicated fiber connection and I believe the DSL (Comcast) connection you have is a shared connection, so you may not get the full capacity of the circuit like you would with the dedicated circuit. The calls will run off the 50mb circuit and the remaining bandwidth is available to you to do what you wish, backup connectivity, main connectivity, etc.

Let us know what questions you have regarding the new circuit or agreement, thanks.
